

BUTLERIB® II ROOF SYSTEM

Built for the realities of construction where timelines matter and long-term performance cannot be compromised, every component of this roof system is engineered for durability and control. From panel strength to fastener security, every detail supports faster installation, controlled movement and long term reliability.

Durable Butler Cote™ finish options provide lasting resilience while maintaining the appearance and performance owners expect.

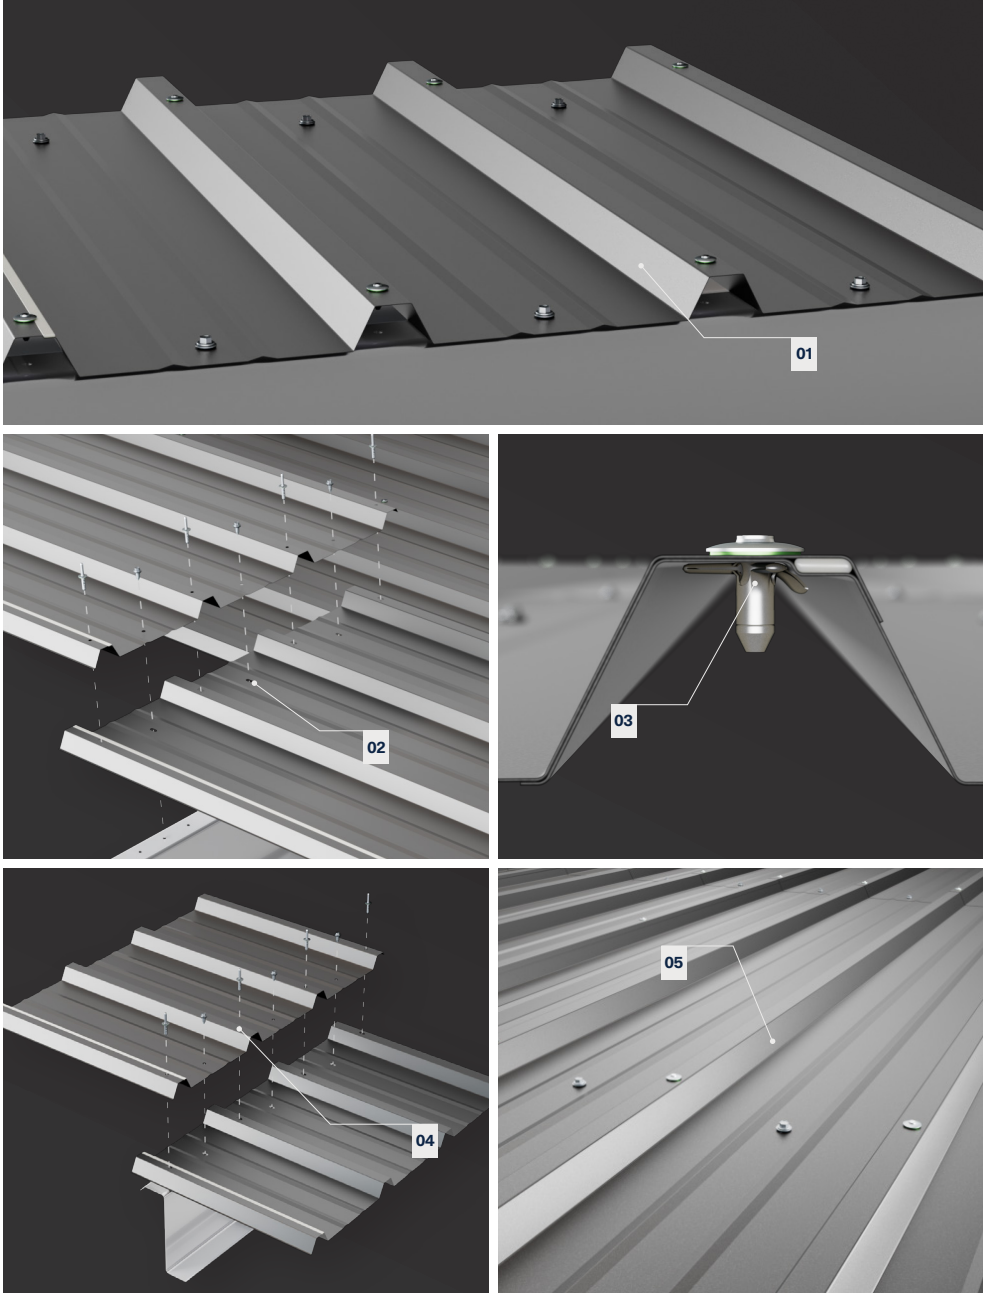

KEY BENEFITS

- **Reliable Performance**
Provides consistent protection for cost sensitive projects.
- **Faster Installation**
Reduces labor through accurate factory punching and clean alignment.
- **Lower Maintenance**
Secure fastening and controlled movement limit service needs.
- **Improved Energy Outcomes**
Cool color finish options support energy performance goals.

PRODUCT FEATURES

- 1. 1 ½" Trapezoidal Rib Profile**
Strengthens the panel and improves roof drainage.
- 2. Factory-Punched Precision**
Ensures accurate alignment and reduces field adjustments.
- 3. Lock-Rivet Fastener**
Supports long-term panel security with proven pullout strength.
- 4. Slotted Holes**
Allow proper expansion and contraction for consistent performance.
- 5. Butler-Cote Finish**
Delivers durable surface protection and improved efficiency.

SPECIFICATIONS

Panel Type	Through-fastened roof panel system
Fastener System	Lock-Rivet fasteners
Rib Profile	1 ½-in trapezoidal rib for strength and drainage
Alignment	Factory-punched panels for precise installation to factory-punched purlins
Thermal Movement	Slotted panel holes
Finish	Butler-Cote finishes
Testing	UL Class 90, FM approved, Miami-Dade certified
Warranty	10-year optional weathertightness warranty
System Compatibility	Works with Butler structural, wall and insulation systems
