

TEXTUREWALL™ WALL SYSTEM

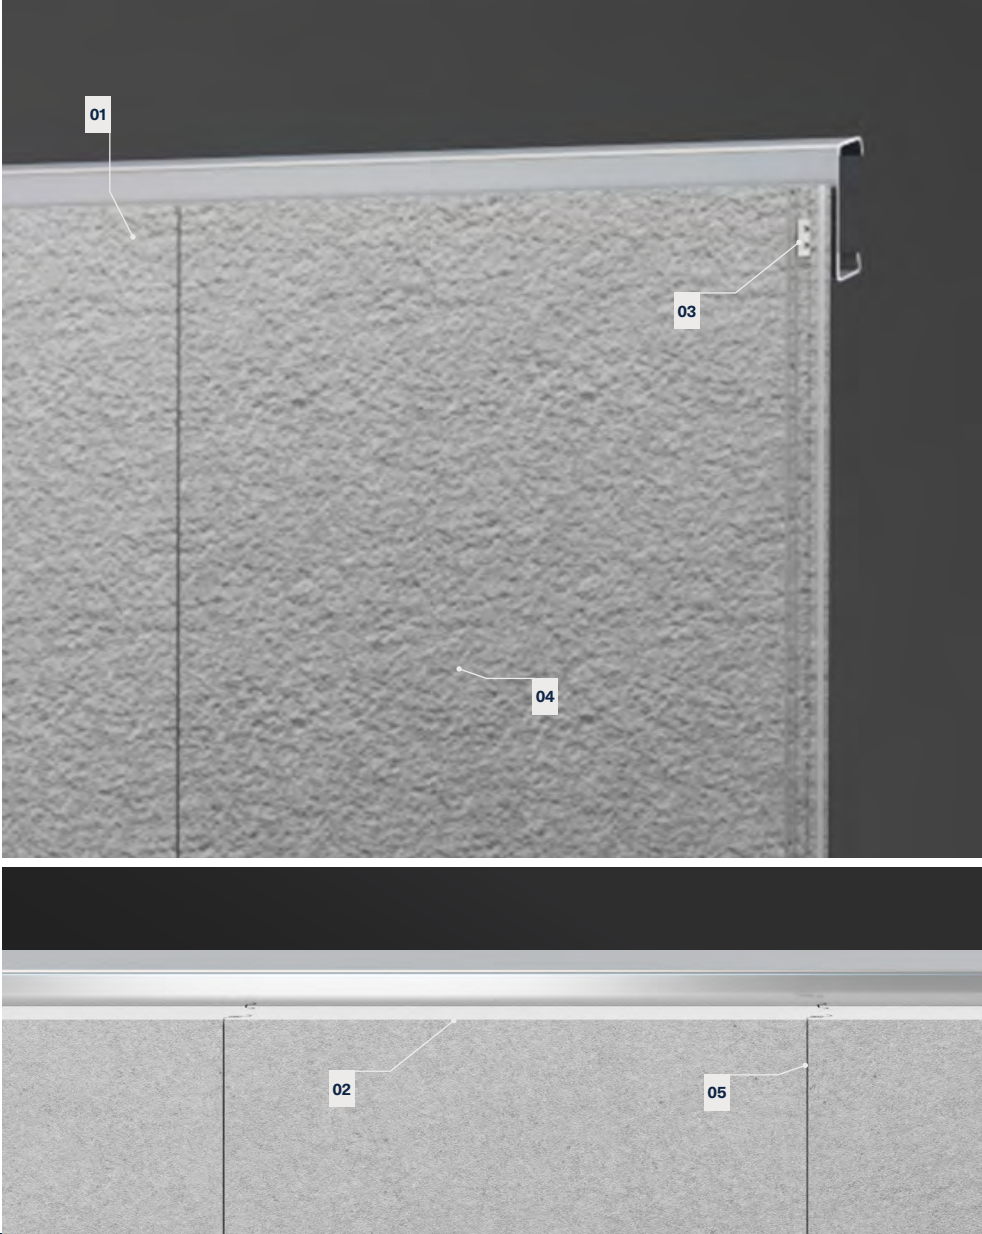

This wall system delivers the character of traditional stucco without the uncertainty that comes with it. It gives the building a textured, architectural presence that feels familiar and refined, while offering the confidence of a high performing, engineered exterior. The surface holds its integrity over time, resisting wear and exposure without the ongoing upkeep typically expected of stucco finishes. Behind the façade, the wall works quietly to support thermal comfort and consistent building performance. Large, uninterrupted panels keep the exterior composed and intentional, even across expansive elevations. The system provides a predictable path from installation to long term use delivering appearance, reliability and peace of mind in equal measure.

KEY BENEFITS

- **Stucco inspired appearance**
Delivers the familiar character people expect, without the uncertainty, delays or variability that often come with traditional stucco applications.
- **Thermal efficiency**
Helps maintain comfortable interior conditions and supports lower energy demand, contributing to a building that operates more predictably day after day.
- **Predictable schedules**
Reduces weather related disruptions, allowing projects to stay on track and move forward with greater confidence and control.
- **Low maintenance**
Preserves the exterior's appearance over time, minimizing upkeep and helping protect the building's long term value.

PRODUCT FEATURES

- 1. Texture-Cote™ Finish**
Factory applied fiber reinforced polymer finish replicates stucco texture.
- 2. Insulated Foam Core**
Polyurethane insulation provides continuous thermal performance.
- 3. Concealed Fasteners**
Hidden attachment system supports a seamless exterior appearance.
- 4. Wide Panel Format**
42" panels reduce joints and speed installation.
- 5. Factory Sealed Joints**
Integrated sealant supports weather tight wall performance.

SPECIFICATIONS

Panel Type	Texture-coated insulated metal panel
Panel Profile	Texture coated flat panel
Panel Width	42"
Panel Gauges	24-gauge exterior, 26-gauge interior
Fastener Type	Concealed
Finish Options	Texture-Cote finish system
Insulation Options	2" to 4" Foamed-in-place, Foam Core
Maximum Insulation Thickness	R 17.9 to R 35.9
Lowest Tested U-Factor	0.058 to 0.028
Warranty	25-year Texture-Cote finish warranty
