

THERMAWALL™ WALL SYSTEM

Strengthen the building envelope with a continuous insulated wall system designed for consistent thermal performance. The system forms an uninterrupted layer of protection that stabilizes interior conditions, controls environmental exposure, and supports efficient building operation over time. Engineered to reduce construction variability while delivering long term durability and reliable thermal performance, the result is a clean, controlled exterior that performs as intentionally as it looks.

KEY BENEFITS

- **Thermal Efficiency**
Helps maintain comfortable, predictable interior conditions while supporting lower energy demand over the life of the building.
- **Moisture Control**
Reduces hidden risk within the wall system, reinforcing confidence that the building will remain protected and perform as intended.
- **Durable Exterior Protection**
Preserves the building's appearance and integrity, standing up to exposure and minimizing long term upkeep.
- **Consistent Installation**
Brings order and reliability to construction, helping the exterior come together smoothly with fewer surprises.
- **System Continuity**
Ensures the wall works seamlessly with the rest of the building envelope, delivering coordinated performance and peace of mind from top to bottom.

PRODUCT FEATURES

1. Continuous insulation core

Insulated metal panels provide uninterrupted thermal performance.
2. Factory-manufactured panels

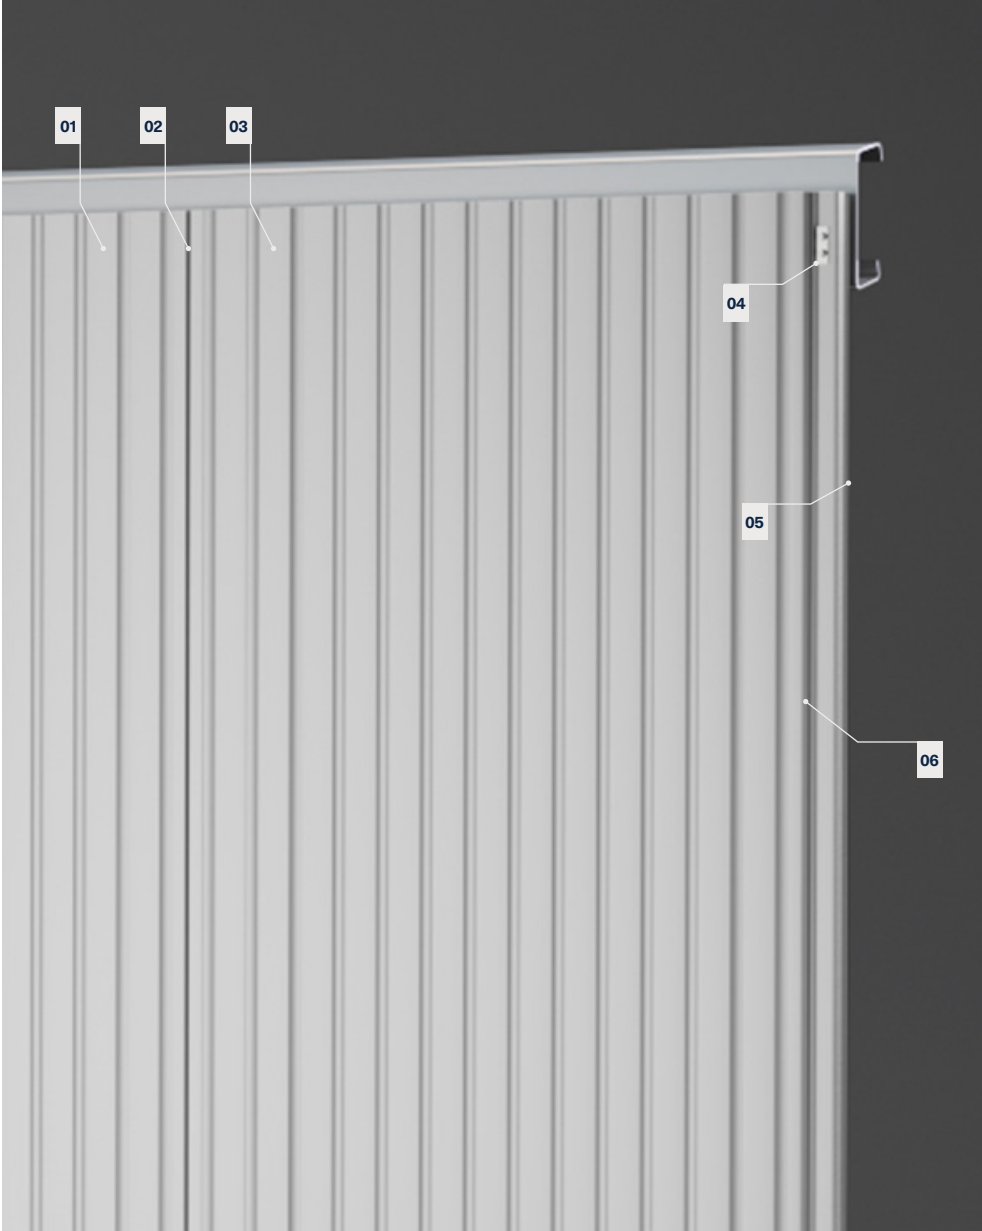

Controlled production ensures consistent panel quality and fit.
3. Durable exterior finish

Exterior coatings are engineered for long-term weather resistance.
4. Concealed fastener system

Hidden attachments support clean exterior appearance.
5. Moisture management design

Panel construction supports controlled moisture behavior.
6. System integration

Coordinates with Butler structural and roof systems.

SPECIFICATIONS

Wall System Type	Insulated metal wall system
Panel Construction	Factory-manufactured insulated metal panels
Insulation	Continuous insulation core
Fastener Type	Concealed fastener attachment
Exterior Finish	Factory-applied durable coating
Thermal Role	Continuous thermal barrier
Moisture Control	Integrated moisture management design
System Integration	Compatible with Butler roof and structural systems
Application	Commercial and industrial wall applications
Warranty	Backed by Butler wall system warranty
